
Gender Policy in Practice

Marjona Tinicheva Gulomjon qizi

Karshi Institute of Engineering and Economics, "Economics" faculty, "Logistics" department, 2nd year student

Annotation: The necessity and importance of women's education. The article also comments on the role of educated girls in life and their incomparable contribution to building the future.

Key words and phrases: women's education, gender politics, science, thinking, women entrepreneurs, opportunities for women's education.

We say that our girls don't know, they don't read, they don't understand because we don't teach them ourselves

Sh. M. Mirziyoyev

In our country, special attention is paid to ensuring the rights and interests of women, including creating conditions for their education. In particular, according to the relevant decree of the President, 4 percent state grant was allocated for women and girls to enter higher education institutions in our country in the 2020- 2021-academic year.

At the moment, 940 women in our republic were lucky enough to use this quota and become students. Great scientists in the history of our nation, among our great grandfathers, such there were also many virtuous women who brought people into the world, brought them up, and inspired them to great deeds. Even today, our women are selfless in raising children, in various fields, in their neighborhoods.

A number of laws, decrees and decisions have been adopted in recent years in order to ease their burden and ensure their rights and interests. In 2021, 2 trillion soums of loans and subsidies were allocated to more than 200,000 projects within the framework of women's entrepreneurship programs, and 320,000 women got permanent jobs. 190,000 women were trained in the profession. More than 4,000 women were allocated funds for the initial housing payment.

2 thousand girls were admitted to higher education on the basis of a separate grant. As a result, 60 percent of students who entered higher educational institutions last year were women. From the 2022-2023 academic year, all women and girls enrolled in the master's program are paid by the state. Graduate students with young children were allowed to study online. This shows how important women's education is in the politics of our country. Since 2020, the "Women's Registry" has been formed, and socio-economic, medical, legal and psychological support has been provided to about 900 thousand women included in it. Currently, more than 630,000 women are listed in the "Women's Registry", 200 000 of them are unemployed. Cases of crime, domestic violence and harassment among women, unfortunately, still exist. The head of our state said that the role and influence of neighborhood activists, public and intellectuals in solving these problems is not felt. - Both our prosperous life today and our bright future depend on women. If we want our people to

be satisfied with us, we must first of all create decent living conditions for our respectable mothers and sisters. If the mother agrees, the family agrees, if the family agrees, the society agrees, - said Shavkat Mirziyoyev.

This can be seen in the Holy Qur'an's chapter "Nisa" (that is, "Women"). In this Surah, Allah calls men to treat women fairly. In the holy hadith, women are also commanded to always do good. Imam Bukhari, Imam Moturidi, Beruni, Ibn Sina, Amir Timur, Alisher Navoi, Babur Mirza, our great ancestors and our enlightened ancestors also emphasized the role and importance of women in the peaceful, strong and prosperous family and the education of children. Who emphasized that the secret is incomparable? Unprecedented attention is being paid to the fundamental reform of the national education system based on the idea that "New Uzbekistan starts from the school threshold". A lot of work is being done to develop the fields of science, culture and art, literature, and sports, to increase the efficiency of spiritual and educational work, and to realize the talents and abilities of young people, especially our girls. Today, we all know and highly appreciate how selflessly our respected sisters are working in the process of change and renewal in our society, in the management system, in the fields of entrepreneurship, science, health care, culture and art, and in the neighborhoods. – says our President. I know many girls of my age and admire them. The policy of our country has created conditions for these girls to be an example to others. Gulrukhbonu Shokirova, Marjona Jurakulova, Rukhsora Shokirova, Mushtariy Masharipova, Kumush Fayzullayeva and others. Among my peers there are many celebrities and admirers like me. I would like to acknowledge the achievements of each of them. Gulrukhbonu Shokirova, 3rd stage student of the University of World Economy and Diplomacy - winner of the "Builder of the Future" medal.

Marjona Jurakulova Shakhrisabz pedagogy 2nd stage student of the institute “Kindness badge owner”.

Rukhsora Shokirova, 9 th grade student of school 159 - adviser to the captains of the head of the Youth Union of Uzbekistan.

Mushtariy Fayzullayeva Navoi - is studying weightlifting at the specialized Olympic reserve boarding school. Mukhlisa Amankulova - 3rd stage student of Karshi engineering-economics institute winner of the scholarship named after Islom Karimov, author of many projects and winner of competitions. Each one achieved many good results and became a place of study and the pride of his relatives, teachers and parents. The main reason is their education. Educate your daughters! They will educate the nation! I read somewhere that in Singapore, women with a diploma get a big dowry from the government when they get married, and if they have a child, they get more money than other uneducated women. So why is that? Because the great reformer Lee Kuan Yew realized that the country's success depends primarily on educated, intelligent women and mothers. History has shown that Lee Kuan Yew was one hundred percent right. A smart and knowledgeable woman evaluates the world and life with a realistic eye, more than uneducated women with a low outlook. Such women can build the future of their lives and families with modern trends and honesty. They will be able to give the right directions to their spouses and children. At least such women can pay great attention to their health and the health of their family. They are able to show their spouses bright paths to future prospects, criticize when necessary, and praise success when necessary. Knowledgeable and intelligent women are above the pain of the stomach, furniture, dishes, rags and other small things in the house. They aim very high and can make plans to take the family to great heights. Such women teach their husbands and children books and guide them to science. It is not for nothing that it is said that behind every great man is a great woman. A woman with a high intellect will definitely raise great children. Blood and body are passed from the father, mind and thinking are passed from the mother. Therefore, it is advisable to marry women who are knowledgeable and religious. Women

with sharp knowledge and intelligence can find their way in life in any situation. Because such women can find ways to protect their families economically and spiritually. Why do intellectuals choose highly talented and intelligent women for themselves, because they know that only weak people choose those who are weaker than themselves, and choose a partner who is suitable and unique for them, who is in tune with the times. Because only such strong women can inspire such strong men. What about us?

In our country, we are taught that "Women's happiness" lies in obedience, eating, sewing, and sacrificing one's life from a young age. No matter how much the trends change, no matter how much the world steps forward, our views are still in the situation of the 15th century. But the world admires not a woman's cooking skills, but her thoughtfulness and professionalism. Never be afraid to show your talent, knowledge, implements your new ideas, completely abandon old stereotypes. It is possible to learn when you want to do laundry and cooking, but it may be too late to fill the brain with knowledge, thinking and skills.

My final conclusions are that I think it is necessary to further strengthen the position of women in society. For this, it is necessary to remove obstacles to the education of women, to create conditions for them to do scientific work and become scientists, to reduce the restrictions on working in high positions, and to determine their place in the state administration. After all, as they say that a woman understands a woman's heart, women working in high positions are good at finding young talents who are being ignored and giving them support and advice to help them become useful people for the society.
